Through spatial and graphical analysis of bird populations on a fictional island, students learn the meaning of biodiversity, species richness, endemism, and abundance. With the teacher acting as a facilitator, students use an interactive GIS map to explore various ways to represent and compare biodiversity across ecoregions.

Bird Island 14,1,0,1 - Crossing Boundaries

Most of the island is covered by Bald Cypress. A small portion is open sandbar with small shrubs. Land Use. The island itself is currently not in use, except for occasional visits by boaters and the Mountain Pine EAST Lab studying the martins. Restricted access to the island during roosting is desirable.

Bird Island | Audubon Important Bird Areas

The Theory of Island Biogeography Island biogeography has been a subject of considerable interest to biologists and geographers since the time of Darwin, Wallace, and the less well-known Hooker. Hooker explored islands in the South Atlantic and South Pacific. Darwin and Wallace are more important in our current thinking, since these two were pioneers in the development of the theory of evolution.

Plum Island is on the Atlantic flyway that runs from the Florida coast up the eastern seaboard to Greenland. A million birds rest on the island before flying on to the Connecticut River estuaries in Lyme, CT. It is possible but doubtful that the Army also overlooked the fact that deer regularly swim between the island and the mainland.

Darwin's finches are a group of about 18 species of passerine birds. They are well known for their remarkable diversity in beak form and function. They are often classified as the subfamily Geospizinae or tribe Geospizini. They belong to the tanager family and are not closely related to the true finches. The closest known relative of the Galápagos finches is the South American *Tiaris obscurus*. They were first collected by Charles Darwin on the Galápagos Islands during the second voyage of ...

Bird Island in Angry Birds Action!. Unlike Piggy Island, Bird Island is a smaller, more natural island. Much of it is filled with dense plant life. Most of its namesake inhabitants live in a large village situated at its edge, where a beach is also nearby. There are also other birds who live in remote areas of the island (such as Edward, Eva and Timothy).
