Physical security is the protection of buildings and all their assets, including people. Integrated physical security recognizes that optimum protection comes from three mutually supporting elements: physical security measures, operational procedures and procedural security measures. That is what this five-step methodology is based on.

A security operations center (SOC) is a centralized unit that deals with security issues on an organizational and technical level. A SOC within a building or facility is a central location from where staff supervises the site, using data processing technology. Typically, a SOC is equipped for access monitoring, and controlling of lighting, alarms, and vehicle barriers.
