Regarding the 2.4V zener diodes: The manual describes them as used for bias voltages, so I'd guess these are not high precision diodes nor have any special properties. I'd replace them by some standard 2V4 zeners, available for some 10cents at Digikey et al. Alas, the manual doesn't have schematics and I wasn't able to find one by a quick googleing, a schematic would allow some analysis and ...

This vintage Heathkit assembly manual for Model HP-23B, an AC Power Supply, is complete, including all the fold-out pages. I would rate its condition as good/acceptable, mainly because many of the pages have pencil marks where the user has checked off items as the manual was followed. On one page, a box has been crossed with an X.
