Welcome to the Companion Website to accompany Modern Control Systems, 11th Edition by Richard C. Dorf and Robert H. Bishop. This site was built to complement the textbook and offers students additional opportunities to review, apply, and explore chapter-specific content. Chapter objectives: A general overview of material covered in each chapter. Practice Exercises: Self-pages review exercises developed to supplement chapter content and help students develop effective problem-solving strategies.

The main topic of Chapter 11 is the design of control systems using state variable models. Full-state feedback design and observer design methods based on pole placement are discussed. Tests for controllability and observability are presented, and the concept of an internal model design is discussed.
